

Data Analyst

Location: Hybrid / Remote | Experience: 1 - 6 Years

About the Role

We are seeking a detail-oriented Data Analyst to transform raw data into actionable insights that drive business decisions. You will analyze large datasets, build dashboards, and collaborate with cross-functional teams to identify trends, patterns, and opportunities for our clients.

Key Responsibilities

- Analyze large and complex datasets to identify trends, patterns, and actionable business insights.
- Design and build interactive dashboards and reports using BI tools (Tableau, Power BI, Looker).
- Write complex SQL queries to extract, transform, and analyze data from multiple sources.
- Perform statistical analysis and hypothesis testing to support data-driven decision-making.
- Collaborate with business stakeholders to understand requirements and translate them into analytical solutions.
- Develop and maintain data documentation, data dictionaries, and analytical playbooks.
- Conduct ad-hoc analyses and present findings to technical and non-technical audiences.
- Leverage AI tools including Claude for advanced text analytics, summarization, and insight generation.
- Ensure data accuracy and integrity through validation and quality checks.
- Support data engineering teams in defining data requirements and pipeline enhancements.

Required Qualifications

- Bachelor's or Master's degree in Statistics, Mathematics, Economics, Computer Science, or a related field.
- 1+ years of experience in data analysis, business intelligence, or a related analytical role.
- Strong SQL skills with experience querying large-scale databases.
- Proficiency in at least one BI/visualization tool: Tableau, Power BI, Looker, or QuickSight.
- Working knowledge of Python or R for data analysis and statistical modeling.
- Experience working with data from cloud platforms (AWS, Azure, GCP).
- Strong analytical thinking, problem-solving skills, and attention to detail.
- Excellent communication skills with the ability to present complex data in a simple manner.

Preferred Qualifications

- Experience with Snowflake, Databricks, or modern cloud data warehouses.
- Knowledge of statistical methods: regression, clustering, time-series analysis.
- Familiarity with AI/ML concepts and tools, including Claude API for AI-assisted analytics.
- Experience with Excel-based modeling and advanced spreadsheet techniques.
- Domain expertise in retail, finance, healthcare, or supply chain analytics.
- Experience in analytics consulting or client-facing analytical roles.

Tools & Technologies

BI & Visualization: Tableau, Power BI, Looker, QuickSight | Databases: Snowflake, Databricks SQL, Redshift, BigQuery | Cloud: AWS, Azure, GCP | Languages: SQL, Python, R | AI Tools: Claude API, ChatGPT, Copilot | Other: Excel,

Google Sheets, Git, Jupyter Notebooks, dbt

What We Offer

- Exposure to diverse industries and high-impact analytical projects.
- Collaborative team environment with continuous learning opportunities.
- Competitive salary and comprehensive benefits.
- Flexible hybrid/remote work options.
- Career growth paths into senior analytics, data science, or analytics leadership.
